

- As a standard in the compressor intake industry, this panel has provided complete protection for twenty years.
- Provides lower pressure drop, greater dust holding capacity, and longer life than the competition.

### DESIGN SPECIFICATIONS PF2212020

<b>SIZE</b>	Nominal 24" x 24" x 11 1/2"
<b>WEIGHT</b>	30 lbs
<b>FILTER MEDIA</b>	Water proof microglass fiber for higher efficiency filtration and extended service life.
<b>FILTER MEDIA AREA</b>	134 sq. ft
<b>FILTER EFFICIENCY</b>	99.97% of 2 Micron
<b>DIRT HOLDING</b>	1135 Grams of ISO Medium test dust at 2500 CFM.
<b>CHANGE OUT</b>	4" w.c.
<b>COLLAPSE STRENGTH</b>	>25" w.c.
<b>FRAME</b>	Galvaneal steel
<b>SPACERS</b>	Corrugated aluminum between each media pleat to maintain pleat opening and lower pressure drop.
<b>SEALANT</b>	Meia pack encapsulated top and bottom, with adhesive on sides.
<b>REMOVAL RINGS</b>	Corrosion resistant rings on each side of panel for ease of removal
<b>CLEANABILITY</b>	Not cleanable
