VISKON-AIRE ✳

Panels and Link Filters
Series 154

Features

- Designed to replace pleated and/or fiberglass throwaway filters. Triple the service life without triple the cost

- Open weave on air entering side traps larger particles; tight weave on air exiting side captures smaller particles

- Media heat sealed around 9 gauge wire frame creating self-sealing gasket, dramatically increasing efficiency.

- Takes up 50% less space compared to standard cardboard framed filters, saving money and lessening trips by maintenance personnel to air handler

- Available in panel and link form. Link form designed for slide-in systems to ease both installation and change out.

- Unaffected by humidity, moisture and most corrosive chemicals

Ideal for:

- Hospitals
- Food and Pharmaceutical processing
- Schools
- General commercial & industrial applications

- Office Complexes
- Airports
- Paint Booths
- Computer Rooms

Construction

- Three ply 100% 6/15/40 denier graduated density Tackified, premium grade, polyester media; heat sealed around 9 gauge corrosion resistant internal wire frame
